github.com/H4LV3D

linkedin.com/in/toluwalope-akinkunmi-a23b02167

Senior frontend engineer with three years of shipping web and mobile products end to end, and more and more of the systems underneath them: single sign-on for a product family, a web and mobile monorepo with shared business logic, a published design system, and real-time audio and video. Now moving into systems design and AI, building products where an LLM does real work.

EXPERIENCE

The Circular Net · thecircularnet.com

Dec 2023 - Present

Frontend Engineer, web & mobile

- Lead frontend engineer across a sustainability platform's product family: the social web app, the iOS and Android app, Circular Ticket on web and mobile, single sign-on, the admin dashboard and the marketing site.
- Rebuilt the social web app on the Next.js App Router with a module per product area, real-time chat and live audio and video rooms (Stream, Pusher); more than 2,000 commits across two versions.
- Built the Expo / React Native app, live on the App Store and Google Play, with live rooms, background podcast playback, deep links, push notifications and separate dev, staging and production builds.
- Designed an npm-workspaces monorepo for Circular Ticket so the Next.js and Expo apps share API services, query hooks, validation and business rules: payout and currency rules exist once.
- Built the OAuth 2.0 single sign-on every product trusts (strict client and redirect validation, Google and Apple sign-in) and published a shared React component library to npm.

Smarkt · smarkt.tech

Dec 2025 - Aug 2026

Frontend Engineer

- Frontend engineering across Smarkt's four core products.

GemsPay Solutions · gemspaysolution.com

Mar 2024 - Present

Frontend Engineer

- Frontend engineering across most of a centralised payments platform covering bulk payments, collections and reconciliation.

Hotrac

Oct 2023 - Apr 2026

Frontend Engineer

- Led the frontend of Export Trades, a cross-border commodity trading platform with quotes, offers, escrow and disputes, multilingual from day one including right-to-left Arabic; largest contributor on a five-person team.
- Built Farmshare's admin dashboard for tractor sharing: users, bookings, transactions, payment requests and maps.

— EXPERIENCE , CONTINUED

Law x Tech · lawxtech.org

Sep 2023 - Present

Web Developer, volunteer

- Built the community's original site, then a 2026 redesign on Next.js 16 with an admin CMS (Auth.js, Postgres, Vercel Blob, rich-text editor, role-based users) that the team runs themselves.

Freelance

Jan 2024 - Jul 2026

Frontend & Mobile Engineer

- Invocipt: invoicing SaaS with multi-business workspaces, public QR payment pages (Paystack, Flutterwave), one-click receipts, and email and web push notifications.
- Architekt: agency site with an AI pricing questionnaire; Gemini via Genkit returns a schema-validated plan, add-ons and estimate that are emailed as a lead.
- Pennywise: Expo personal-finance app and two versions of its website. Life Fount: four-language (English, Yoruba, Igbo, Hausa) medical centre site.
- DS Energy: sales and commissions portal with PDF invoices. Royal Revamps: branding agency site with a database-backed blog and contact.

— PROJECTS

Stock Bot. A scheduled AI agent on AWS Lambda: scrapes the day's biggest losers on the Nigerian Exchange, confirms real dips against five days of history in DynamoDB, asks Gemini for a short analysis and sends the top picks to Telegram. Deployed with GitHub Actions.

— SKILLS

FRONTEND	React, Next.js (App Router), TypeScript, Tailwind CSS, TanStack Query, Redux Toolkit, React Hook Form, Zod, Motion, next-intl
MOBILE	React Native, Expo, Expo Router, NativeWind, Reanimated, EAS Build & Updates, push notifications
SYSTEMS	Monorepos, design systems, OAuth 2.0 / SSO, real-time (Stream, Pusher), shared validation, i18n & RTL, CI/CD
BACK-END & CLOUD	Node.js, Express, Auth.js, PostgreSQL, Prisma, MongoDB, AWS Lambda, DynamoDB, Vercel
AI	LLM APIs (Gemini, Claude), structured output, prompt design, scheduled agents, AI-assisted engineering
